DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recitation "each of said chambers fluidly communicating with at least one other chamber prior to activation of gas generator" in claim 24 renders the claim indefinite for being unclear because according to the specification, the gas generant charge 25 is preferably positioned in the chamber 25, and the gas generant charge 25 produces gas in response to activation of the gas generator, in other words, each of the chambers fluidly communicates to each other after activation of the gas generator but not prior to activation of the gas generator.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al (U.S. 6,328,336).

Application/Control Number: 10/811,253 Page 3

Art Unit: 3616

With respect to claims 24-26, Takahashi et al discloses a gas generator for a vehicle occupant protection system comprising: a housing (2); a plurality of chambers (chamber within the diffuser 15, chamber between the inflator housing 2 and container 5, chamber 9, chamber within container 5) formed within said housing, wherein each of said chambers fluidly communicates with at least one other chamber, whereby the chambers are formed to establish opposing fluid flow in each adjacent chamber (see attached figure 1 below) upon gas generator activation (fluid flow in the chamber of diffuser 15 is opposed to fluid flow in the chamber between the housing 2 and container 5); wherein, the gas generator comprising four substantially parallel chambers (chamber within the diffuser 15, chamber between the inflator housing 2 and container 5, chamber 9, chamber within container 5) extending in said housing.

Figure 1 of Takahashi et al is attached below for better illustration of the examiner's interpretation.

Response to Arguments

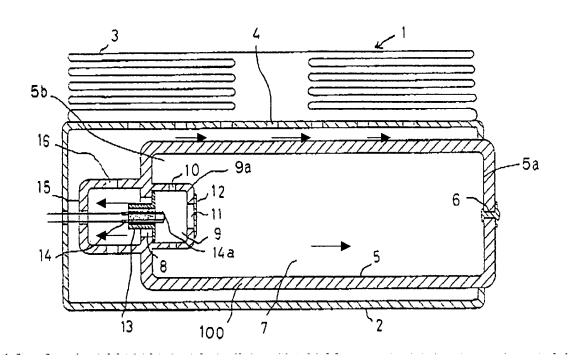

5. Applicant's arguments, see remark, filed January 3, 2006, with respect to claim 21-23 have been fully considered and are persuasive. The rejection of claims 21-23 in previous office action has been withdrawn.

Allowable Subject Matter

6. Claims 1-23 are allowed.

Application/Control Number: 10/811,253

Art Unit: 3616

Arrows in the chambers indicated directions of fluid flow

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 10/811,253 Page 5

Art Unit: 3616

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan C. To whose telephone number is (571) 272-6677. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (571) 272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
